TRENDS IN
ANALYTICAL
CHEMISTRY

Volume 8

REFERENCE EDITION
1989

CONTENTS

JANUARY, 1989

feature
Analytical chemistry: the most frequently cited papers during the past 25 years, *by T. Braun, A. Schubert and S. Zsindely* 1

meeting reports
4th International symposium on separation science and biotechnology 6
4th Conference on computer applications in analytical chemistry (COMPANA 88) 7

computer corner
Method validation: software to plot calibration lines and their response residuals, and to detect outliers according to Cook's distance, *by F. X. Rius, J. Smeyers-Verbeke and D. L. Massart* 8

biotechnology focus
Analytical strategies in biotechnology, *by I. J. Higgins, G. Hall and A. Swain* 12

trends
Analytical applications of Raman spectroscopy in the pharmaceutical field, *by L. G. Tensmeyer and M. A. Heathman* 19
New interfacing techniques for capillary high-performance liquid chromatography–mass spectrometry, *by D. Ishii and T. Takeuchi* 25
Applications of picosecond spectroscopy to analytical chemistry, *by G. J. Blanchard* 29
Automatic precipitation–dissolution in continuous flow systems, *by M. Valcárcel and M. Gallego* 34

books
Flow perturbation gas chromatography (by N. A. Katsanos), *reviewed by C. F. Poole* 41

audio course
Laboratory safety and health (by J. Kaufman), *reviewed by K. H. Broer* 41

software
Protein purification (by A. G. Booth), *reviewed by J. McD. Armstrong and M. T. W. Hearn* 42

FEBRUARY, 1989

opinion
Perspectives on analytical research and development within the pharmaceutical industry: focus on proteinaceous drugs, *by L. A. Sternson* 43

meeting reports
25th International symposium on advances in chromatography 45
5th International symposium on bioluminescence and chemiluminescence 47

computer corner
Method validation: software to compare the slopes of two calibration lines with different residual variance, *by D. L. Massart, J. Smeyers-Verbeke and F. X. Rius* **49**

trends
Applications of gas chromatography–Fourier transform IR spectrometry in environmental analyses, *by C. J. Wurrey* **52**
Chemical sensors and intelligent instrumentation, *by D. Diamond* **58**
Contemporary wet-chemical flow analyzers for process control, *by M. Gisin and C. Thommen* **62**
Thin-layer chromatography of eicosanoids, *by E. Granström* **67**
Recent advances in immunoassay of steroid hormones, *by R. Hampl and L. Stárka* **72**

books
Forensic science handbook, Vol. II (edited by R. Saferstein), *reviewed by J. Robertson* **76**
Comprehensive organometallic analysis (by T. R. Crompton), *reviewed by P. C. Uden* **76**
Applications of new mass spectrometry techniques in pesticide chemistry (edited by J. D. Rosen), *reviewed by W. M. A. Niessen* **77**
Quantitative gas chromatography — for laboratory analysis and on-line process control (by G. Guiochon and C. L. Guillemin), *reviewed by J. K. Haken* **78**
Two-dimensional NMR spectroscopy — applications for chemists and biochemists (edited by W. R. Croasmun and R. M. K. Carlson), *reviewed by J. Reglinski* **78**
On-column injection in capillary gas chromatography (by K. Grob), *reviewed by D. W. Grant* **79**
Statistics for analytical chemistry (by J.C. Miller and J.N. Miller), *reviewed by P. Van Espen* **79**

MARCH, 1989

feature
Contract analytical services, *by R. E. Peppers* **81**

meeting reports
International symposium on current separation techniques for macromolecules **83**
17th International symposium on chromatography **84**
International symposium on coupled column separations **85**

computer corner
APL in a chemical application: processing of spark source mass spectrometry data, *by X. D. Liu and T. Babeliowsky* **88**

trends
Microcolumn high-performance liquid chromatography with Fourier transform infrared spectrometric detection, *by C. Fujimoto and K. Jinno* **90**
High-performance liquid chromatography of basic drugs on cyanopropyl-bonded phases: practical aspects, *by M. De Smet and D. L. Massart* **96**
Radioimmunochemical analysis of neuropeptides based on general characteristics of the analyte, *by J. F. Rehfeld* **102**
Therapeutic monitoring of free (unbound) drug levels: analytical aspects, *by A. C. Mehta* **107**
The advantages of immunoassay in food analysis, *by L. Fukal and J. Káš* **112**

books
^{13}C NMR spectroscopy (by H. Kalinowski, S. Berger and S. Braun), *reviewed by M. Munowitz* **117**
Nuclear analytical techniques in medicine (edited by R. Cesareo), *reviewed by G. H. Kramer* **118**

APRIL, 1989

opinion

Analytical chemistry in the 1990s, *by W. F. Pickering and D. E. Ryan* 119
Commentaries, *by P. T. Kissinger and A. Townshend* 122

meeting reports

Third international colloquium on solid sampling with optical atomic spectroscopy 123
Fifth international conference on quantitative surface analysis 124

computer corner

Program for Doehlert matrix design of experiments, *by H. Yuzhu* 126

erratum 128

trends

Electrokinetic chromatography: an interface between electrophoresis and chromatography, *by S. Terabe* 129
Sample preparation using bonded silica: recent experiences and new instrumentation, *by R. D. McDowall, J. C. Pearce and G. S. Murkitt* 134
Trace level analysis of vinca alkaloids in biological fluids, *by D. E. M. M. Vendrig and J. J. M. Holthuis* 141
Application of polarography in petrochemical analysis, *by J. Polák and J. Janáček* 145

books

Chromatography: concepts and contrasts (by J. M. Miller), *reviewed by C. F. Poole* 151
Analytical applications of spectroscopy (edited by C. S. Creaser and A. M. C. Davies), *reviewed by L. R. Croft* 151
Fundamentals of thin layer chromatography (planar chromatography) (by F. Geiss), *reviewed by U. A. Th. Brinkman* 152
Immunoassays for veterinary and food analysis, Vol. 1 (edited by B. A. Morris, M. N. Clifford and R. Jackman), *reviewed by B. A. Warden* 153

MAY, 1989

feature

How to be a (reasonably) successful consultant, *by P. E. Stanley and D. K. Wright* 154

monitor

Textbook trails of eponymic knowledge in analytical chemistry, *by T. Braun and A. Pálos* 158

computer corner

A simple look at the structure of data matrices, *by V. Zitko* 161

trends

On-line coupled high-performance liquid chromatography–gas chromatography, *by K. Grob* 162
Simple high-performance liquid chromatographic methods for resolving complex mixtures, *by J. J. Kirschbaum and J. E. Noroski* 166
Novel kinetic approaches to flow injection analysis, *by M. D. Luque de Castro and M. Valcarcel* 172
Analysis of eumelanin-related indolic compounds, *by S. Pavel* 177
Analytical procedures for determining acylcarnitines in biological fluids, *by S. Lowes and M. E. Rose* 184

audio course

Sequential simplex optimization (by S. N. Deming and S. L. Morgan), *reviewed by R. G. Brereton* 188

books

Electrochemical detection techniques in the applied biosciences, Vol. 1, Analysis and clinical applications (edited by G.-A. Junter), *reviewed by H. Gunasingham* 190

JUNE/JULY, 1989

editorial

Materials analysis in high technology — from analytical chemistry to analytical science, *by M. Grasserbauer* 191

trends

The challenge of high technology for analytical chemistry, *by M. Grasserbauer* 192
Sputtered neutral mass spectrometry, *by W. Reuter* 203
X-Ray fluorescence analysis using synchrotron radiation, *by H. Saisho* 209
High spatial resolution Auger electron spectroscopy and X-ray photoelectron spectroscopy, *by H. Hantsche* 215
Fourier transform IR analysis of thin solid films, *by P. Grosse* 222
Electron holography, *by A. Tonomura* 226
Atomic resolution analysis with scanning tunneling microscopy, *by H. Neddermeyer* 230
Surface studies with optical second-harmonic generation, *by T. F. Heinz and G. A. Reider* 235

books

Laser remote chemical analysis (edited by R. M. Measures), *reviewed by S. R. Long and A. P. Force* 243
Materials characterization and chemical analysis (by J. P. Sibilia), *reviewed by D. C. Coleman* 244

AUGUST, 1989

meeting reports

1st International symposium on chromatography and isolation of insect hormones, pheromones and related compounds 245
1st International workshop on element concentration cadasters in ecosystems 246
2nd International symposium on polymer analysis and characterization 247

computer corner

Principal components of a fuzzy clustering, *by P. J. Rousseeuw, M.-P. Derde and L. Kaufman* 249

trends

Enantiomeric separation of drugs and related compounds based on their interaction with α_1-acid glycoprotein, *by J. Hermansson* 251
Biopolymer determinations by high-performance liquid chromatography with low angle laser light scattering photometry, *by I. S. Krull, R. Mhatre and H. H. Stuting* 260
Micellar catalysis for the derivatization of carboxylic acids in physiological matrices, *by F. A. L. van der Horst* 268
Software driven instrumentation. Application to on-line process liquid chromatography, *by C. L. Guillemin* 273

books

The basics of technical communicating (by B. E. Cain), *reviewed by I. Weeks* 277
Selective sample handling and detection in high performance liquid chromatography, Part A (J. Chromatogr. Library, Vol. 39A) (edited by R. W. Frei and K. Zech), *reviewed by R. D. McDowall* 277
Beispiele zur Datenanalyse mit BASIC-programmen (by G. Henrion, A. Henrion and R. Henrion), *reviewed by B. G. M. Vandeginste* 278
Methods in biochemical analysis (Vol. 33) (edited by D. Glick), *reviewed by E. R. Nice* 279
Chromatographic enantioseparation: methods and applications (by S. G. Allenmark), *reviewed by I. W. Wainer* 279

SEPTEMBER, 1989

monitor

Charting national research performances in analytical chemistry, 1981–1985, *by T. Braun, W. Glänzel and A. Schubert* 281

meeting reports

First international symposium of high performance capillary electrophoresis 284
Sixth international symposium on preparative liquid chromatography 285
Sixth symposium on ion chromatography 286

computer corner

Display methods for dendrograms, *by D. B. Sibbald, P. D. Wentzell and A. P. Wade* 289

trends

Microsequencing of peptides and proteins, *by A. D. Strosberg, L. Camoin and J.-L. Guillaume* 292
Production and properties of microbial enzymes participating in polyamine and sialic acid metabolisms and their analytical applications to monitoring tumor cell growth, *by T. Uwajima* 298
Automated kinetic-based determinations for routine analysis: recent developments, *by D. Perez-Bendito, M. Silva and A. Gomez-Hens* 302
Chromatographic techniques for lipid analysis, *by E. W. Hammond* 308

books

Electroanalytical techniques in clinical chemistry and laboratory medicine (by J. Wang), *reviewed by A. M. Bond* 313
Non-isotopic immunoassay (edited by T. T. Ngo), *reviewed by J. Káš* 314
Inorganic mass spectrometry (edited by F. Adams, R. Gijbels and R. Van Grieken), *reviewed by P. D. Blair* 314

OCTOBER, 1989

opinion

Undergraduate analytical chemistry: inducing a metamorphosis, *by A. J. Cunningham* 315

monitor

National research efforts in analytical chemistry, 1981–1985, *by T. Braun, W. Glänzel and A. Schubert* 316

meeting reports

19th IAEAC annual symposium on environmental analytical chemistry and 5th metal speciation workshop in groundwaters 318
3rd International symposium on quantitative luminescence spectrometry in biomedical sciences 321
Chemically modified oxide surfaces symposium 322

computer corner

Peak simulation for non-segmented continuous flow systems, *by T. Korenaga, H. Yoshida, F. Shen and T. Takahashi* 323
An adaptation of ARTHUR for microcomputers, *by I. S. Scarminio and R. E. Bruns* 326

trends

In situ coupling between electrochemistry and mass spectrometry — a literature review, *by H. Chang, D. C. Johnson and R. S. Houk* 328
Atomic absorption spectroscopy with tunable semiconductor diode lasers, *by R. Hergenröder and K. Niemax* 333
New sample introduction devices for analytical atomic spectrometry, *by A. Gustavsson* 336
Developments in the speciation of mercury in natural waters, *by W. H. Schroeder* 339
Multinuclear solid-state NMR in silicate and zeolite chemistry, *by G. Engelhardt* 343

books
Basic gas chromatography–mass spectrometry (by F. W. Karasek and R. E. Clement), *reviewed by R. Saferstein* 348
Gas chromatography–mass spectrometry: a knowledge base (by F. A. Settle, Jr. and M. A. Pleva), *reviewed by R. Saferstein* 348
Practical HPLC method development (by L. R. Snyder, J. L. Glajch and J. J. Kirkland), *reviewed by I. S. Krull* 349
Modern supercritical-fluid chromatography (edited by C. M. White), *reviewed by P. Schoenmakers* 350
Analytical and biomedical application of ion-selective field-effect transistors (by P. Bergveld and A. Sibbald), *reviewed by J. Janák* 352

NOVEMBER/DECEMBER, 1989

meeting reports
3rd International laboratory information management systems conference 353
2nd Workshop on microwave ashing and digestion for trace element analysis 355
1st International symposium on field flow fractionation 355

computer corner
A program for calculating Mahalanobis distances using principal component analysis, *by N. K. Shah and P. J. Gemperline* 357

trends
Toxicological screening by liquid chromatography, *by S. R. Binder, M. Regalia and G. Sivorinovsky* 362
Analysis of biological fluids by high-field nuclear magnetic resonance spectroscopy, *by I. D. Wilson, K. E. Wade and J. K. Nicholson* 368
Fast atom bombardment mass spectrometry of protein and carbohydrate biopolymers, *by A. Dell and M. E. Rogers* 375
Surface analysis of environmental samples, *by M. Soma and H. Seyama* 379

books
Atlas of polymer and plastic analysis (by D. O. Hummel and F. Scholl), *reviewed by J. K. Haken* 383
Electrochemical detection techniques in the applied biosciences (by G. A. Junter), *reviewed by H. Gunasingham* 384
Microcomputers and laboratory instrumentation (by D. J. Malcolme-Lawes), *reviewed by B. G. M. Vandeginste* 385
Troubleshooting LC systems (by J. W. Dolan and L. R. Snyder), *reviewed by P. T. Kissinger* 385

software
PARVUS, an extendable package of programs for data exploration, classification and correlation (by M. Forina, R. Leardi, C. Armanino and S. Lanteri), *reviewed by A. P. Wade and K. A. Soulsbury* 386
